

Setting Up Campus Grade Book - Elementary School

Additional Details available on Campus Community -

<https://content.infinitecampus.com/sis/1633/documentation/campusinstruction/>

For proper functionality, the following steps MUST be completed in order for EACH section PRIOR to creating assignment

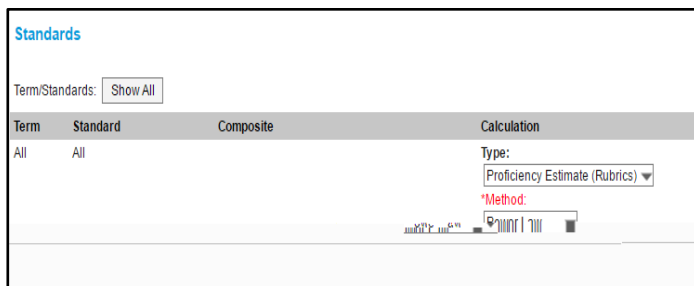

1. Set Grade Calc Options
2. Create Categories
3. Use Category Copier, if desired to add the same categories to different sections
4. Begin to add assignments

1. Grade Calc Options

Use Proficiency Estimate (Rubrics) and Power Law

2. Create Categories

1. Create a Category for EACH standard with the SAME name as the standard
2. Weight—no impact for Standards based grading
3. Place the Category in all terms
4. Attach Category to the corresponding Standard ONLY

Power Law

The Power Law calculation approximates a student's proficiency by taking their scores and determining a trend line through a linear regression. This is widely used to calculate final scores in standard-based grading.

3. Category Copier

← Only elementary teachers who teach Multiple Sections of the SAME content area should use Category Copier

4. Adding Assignments

At the top of the grade book, you will see three drop down menus. The first drop down shows the Term selected. For the first term, select T1; T2 for Term 2 etc.

The second drop down area indicates Period, Course, and Section information

The third drop down lists all the Standards associated to the Section
